IEGULDĪJUMU PĀRVALDES SABIEDRĪBAS ZIŅOJUMS

Investment fund "CBL Global Emerging Markets Bond Fund" (hereinafter - the Fund) is a debt security investment fund and, following changes of the Fund's base documents, effective from 01/01/2018, has two share classes: R Acc USD and R Acc EUR (hedged). As a result, investors now have an option to invest either in euros (R Acc EUR (hedged) class) or in US dollars (newly created R Acc USD class). The assets of the Fund are managed by the asset management company "CBL Asset Management" IPAS with registered office at Republikas laukums 2a, Riga, LV-1010 and registration No. 40003577500. The number of Investment Company's operating license, which was last re-registered on 19 January 2015, is 06.03.07.098/367.

The Fund aims to achieve long-term capital appreciation by investing in debt securities issued or guaranteed by central governments, municipalities, central banks, credit institutions and commercial companies of the developing countries. The investment portfolio of the Fund is diversified to include investments in different currencies, industries and countries, thereby achieving a higher protection against volatility of the Fund's asset value versus investments in a single currency, industry or country securities. There were no changes to the Fund's policy during the reporting period.

As at the end of the reporting period, the amount of Fund's net assets amounted to EUR 25,029,601. As at 30.06.2018, gross assets amounted to EUR 25,765,246. Return and value are being calculated for each investment class seperately. The share value of the "CBL Global Emerging Markets Bond Fund" R Acc USD share class during the reporting period increased by EUR 0.06 and at the end of the period it amounted to EUR 8.40; the share value of the "CBL Global Emerging Markets Bond Fund" R Acc EUR (hedged) share class during the reporting period decreased by EUR 0.37 and at the end of the period amounted to EUR 11.06. "CBL Global Emerging Markets Bond Fund" R Acc USD share class's total return in the first half of 2018 was 1.50% (annualized) in terms of euro, according to the ECB's rates, and negative 3.99% (annualized) in terms of its base currency (USD) and market exchange rates. "CBL Global Emerging Markets Bond Fund" R Acc EUR (hedged) share class's total return in the first half of 2018 was negative 6.42% (annualized) in terms of euro, according to the ECB's rates, and negative 6.60% (annualized) in terms of its base currency (EUR) and market exchange rates.

In January 2018 global financial markets kept climbing higher, as equity markets reached new all-time highs and high yield bond spreads kept tightening further. However, as of February, the mood changed rather abruptly, amid rising concerns of higher US interest rates, appreciating US dollar, and growing anxiety amongst the USA and China, and Europe in relation to trade tariff tensions affecting numerous industries. Both emerging market Eurobonds and local currency debt felt the negative effect – EM Eurobonds fell, on average, by 4%, while local currency segment, in USD terms, detracted by almost 6.5%.

Region-wise, the main negative contribution came from Latin America, as most of the headlines were reserved for Brazil, Mexico and Argentina; the latter suffered from a steep local currency depreciation, in excess of 30%, during the first half of the year, and was followed by a deal with the IMF financial assistance in the amount of USD 50bn. During the first few months of the year, Brazil was cut deeper into junk territory, as both international rating agencies, Fitch and S&P, downgraded state's foreign currency long-term credit rating by one notch from BB to BB-, with stable outlook. The agencies lowered their ratings on the largest South American country following President Temer's decision to shelve an overhaul of Brazil's much needed pension system. Moreover, the state's growth forecast was further tampered by the truck drivers' strike against an increase in fuel prices, paralysing Brazil's economy for about 10 days, disrupting production activity in several industries, fuel running short at petrol stations and even food supply running short at the grocery stores. As for Mexico – investors began to pay more attention to the presidential elections that took place in early July, while still closely following the news flow on potential NAFTA trade deal. Finally, it is worth mentioning that during the first six months of the year, all of the regions suffered losses, at least to some extent.

Over the reporting period, exposure to India was increased the most, up to 8.12% from 2.37%; meanwhile, several new positions were also initiated, namely, in Chile, Croatia and Belarus, simultaneously, being among the main exposure increasing trades during the period. On the other hand, Bulgaria was sold out completely (as of the beginning of the year, Bulgaria had a weight of 4.35% of Fund's total assets); exposure to Brazil and Argentina were also cut down rather substantially, down to 5.69% and 1.56%, from 9.68% and 4.12%, respectively. As at the end of the reporting period, and as a result of trades made, India (8.12%), Russia (7.99%), local currency debt securities issued by international financial institutions (6.81%) and Mexico (6.63%) had the largest exposures within the Fund's portfolio. On the back of price fluctuations and trading activity, the Fund's yield-to-maturity increased by one percetage point, up to 5.8%, average duration inched up just slighty from 3.2 to 3.4, while weighted avereage credit rating ticked up by a notch, from the highest high yield credit rating (Ba1) to the lowest investment grade credit rating (Baa3).

During the reporting period, management costs amounted to EUR 197,273, which does not exceed the maximum value of 3.00% provided in the Fund's prospectus. The investment management company fee amounted to EUR 172,204, custodian fee - EUR 20,665, other management expenses - EUR 4,404.

During the period between the last day of the reporting year and the date of the approval of the half-year report there have been no significant events that have material effect on the Fund's financial position.

Members of "CBL Asset Management" IPAS management team closely monitor the developments both on domestic and global scale of such factors as sustainability of economic growth, monetary and fiscal policies of leading economies as well as potential inflationary and political risks in light of their material impact on the economic and capital market dynamics of the region. A critical selection of instruments will continue to play a decisive role in the process of the Fund's investments, irrespective of the industry or country.

The total assets of CBL Global Emerging Markets Bond Fund consist of the total net assets of both classes in the Fund's measurement currency; when revaluating the total assets of CBL Global Emerging Markets Bond Fund at the exchange rate published by the European Central Bank, an exchange rate difference between the total amounts of both classes arises which leads to the difference from the net assets presented elsewhere in the financial statements.

"CBL Global Emerging Markets Bond Fund" R Acc EUR (hedged) share class performance dynamics and profitability of the investment fund for the previous periods refer to the CBL Global Emerging Markets Bond Fund.

^{*} Profitability is calculated, assuming there are 365 days in a year.

^{**} Net asset value is revaluated into the USD using exchange rates determined in financial markets at the end of the day.

^{***} Net asset value is revaluated into the EUR using exchange rates that are determined in financial markets at the end of the day
